- Diamond neon is a highly specialized end-to-end company that seeks to streamline and perfect the signage manufacturing process.
- Combining skilled professionals, ongoing training, and up-to-date equipment and software, Diamond neon offers the most complete signage service possible.
- Our expertise extends through design fabrication, paint, assembly, install and even programming for multimedia screen displays.

Facilities and Capability

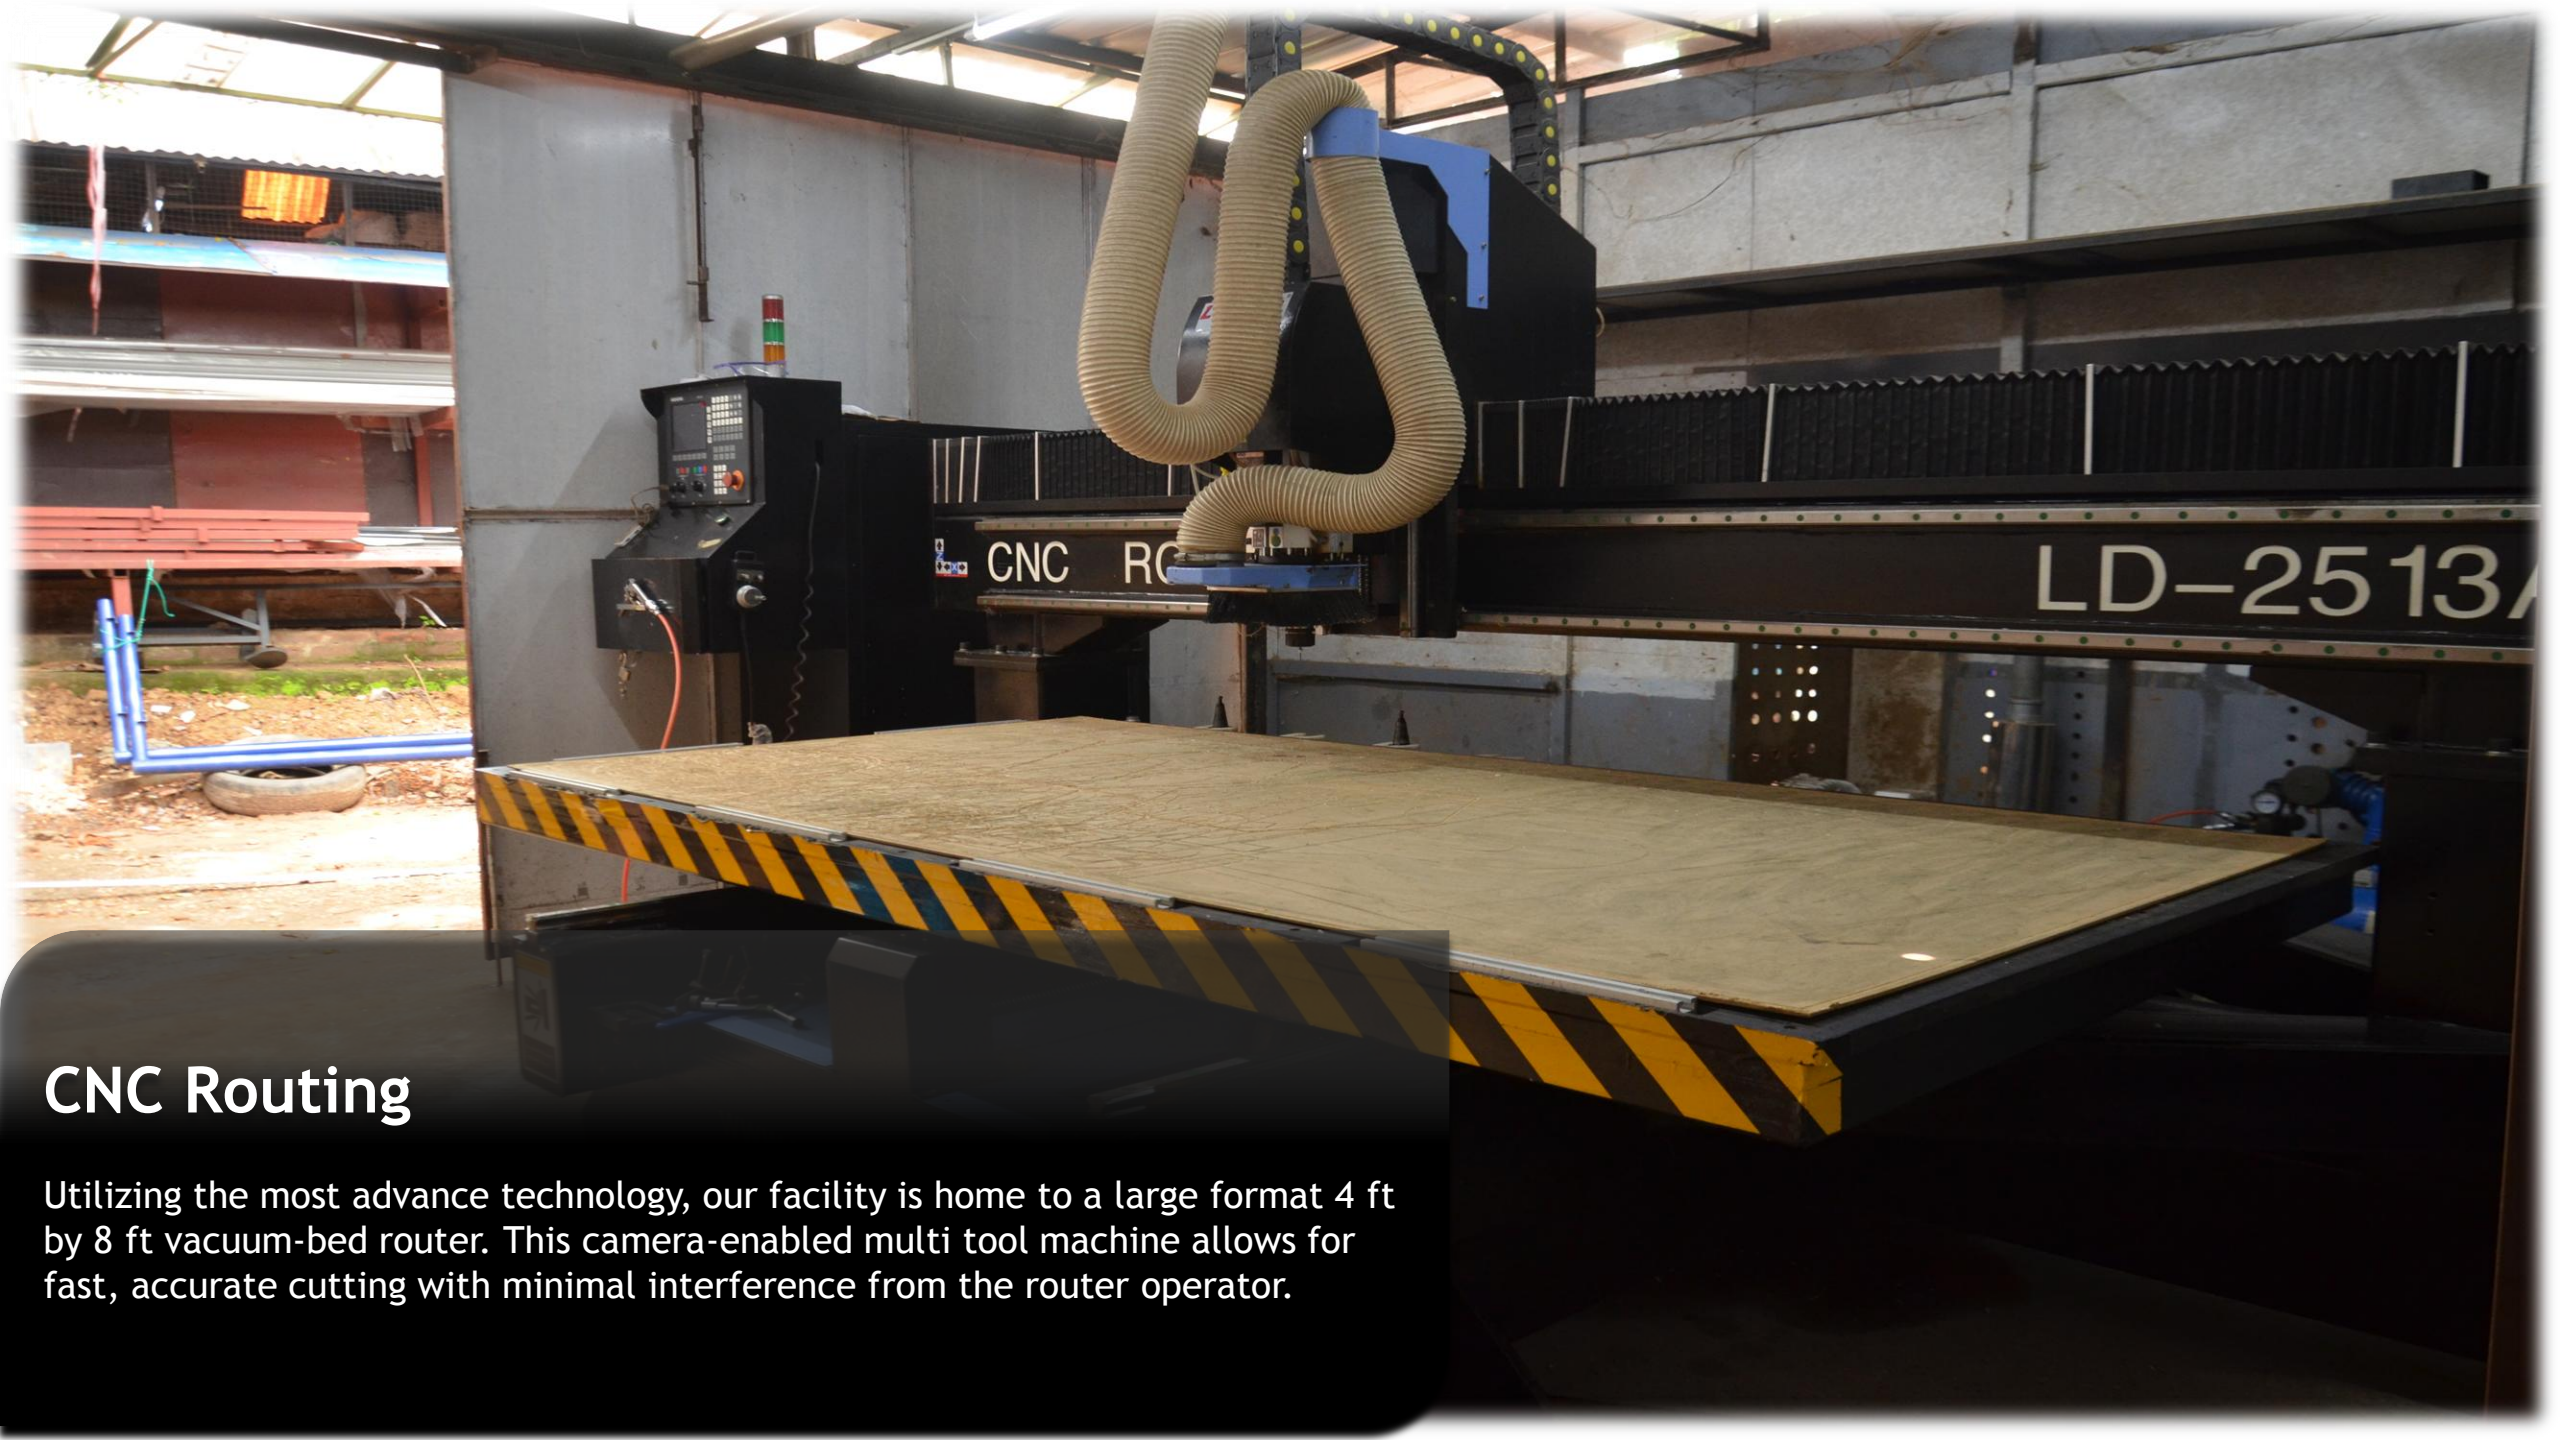

Here at Diamond, we boast an impressive set of inhouse facilities that allow us to take almost every project concept through to completion without the hindrance of requiring third party production that can slow the production down. Coupled with experienced staff and specially designed proprietary workflow software, we are uniquely positioned to get the job done right, from sky signs to LED screen displays.

Print & Vinyl

Our print and vinyl department is home to Vinyl / Sticker Plotters, a Large Format Digital Printer and flatbed applicator. Between these, we manage to process a staggering 4 kilometers of vinyl on average every year.

CNC Routing

Utilizing the most advance technology, our facility is home to a large format 4 ft by 8 ft vacuum-bed router. This camera-enabled multi tool machine allows for fast, accurate cutting with minimal interference from the router operator.

Metal Fabrication & Assembly

Included in our manufacturing facility is a dedicated metal fabrication and assembly area used in the processing, production and finishing of frames, footings and faces of all sizes. We are capable of handling not just metal, but acrylic, composite panel, wood and more.

Installation

Our signage expertise is not just limited to the inside of our factory. In fact, we own a small fleet of appropriately-sized vehicles for sign transportation and delivery. We also have in our employ dedicated installers and direct access to trusted contractors for additional manpower where needed.

Methodology and Work Plan

Preparation & Planning

Upon acceptance of the quote, a Job sheet and schedule is prepared using Our proprietary workflow management software Developed to allow us to best manage your project.

If artwork is required, this is produced by our graphic And industrial designers and submitted for your approval. When all proposed designs and construction methods have Been finalized and signed off, the files and documents are distributed to individual departments as necessary,

A production meeting is now held for all supervising staff To discuss the project and help facilitate the necessary Interdepartmental collaboration to get the job done right Within the confines of your time frame. Following this, Our Purchasing Officer orders all materials and assigns Stock to your project. Our network of local suppliers Ensures we get the best materials for the job in a timely fashion.

Production

Each department carries out their assigned roles and monitors progress using our software. This allows us to instantly recognize timeframe-altering issues and course-correct on the fly. A weekly production meeting is also held to report on work and resolve outstanding issues.

During production the individual departments take ownership of the project by keeping running quality checks. This is also verified by the Project Manager on a weekly basis to make sure all works meet your standards and expectations.

Install & Delivery

Based on the individual job requirements, we can either have the works delivered to the required destination, or installed. Completed signs are properly wrapped and packaged to eliminate the possibility for damage during transit.

We have in our employ a number of installers and appropriate vehicles for transport as well as access to trusted subcontractors, and are also happy to work alongside your own preferred installation team if needed. Once installed, signs and site alike are cleaned and readied for sign-off.

Standard Warranty

Diamond Neon, we warrants all work for a standard period as outlined below, commencing from the date of install at if an extended warranty period is desired, we can accommodate this subject to job specifics.
